### SPECIES:

Our standard products (excluding products for cooking/smoking and specific products) contain a mix of hardwoods: hornbeam, ash, beech, oak.

Except for the 1.20m<sup>3</sup> pallets: this is a special format produced in large quantities, so the wood is not sorted. This product contains a mix of various woods (including 10% softwoods). Additionally, the wood may appear darkened due to extended natural drying, and there is 20% logs.

### MOISTURE:

We offer two qualities:

- Semi-dry wood: to be burned at least 2 months after purchase.
- Dry wood (<23% moisture): ready to burn immediately.

### ORIGIN:

100% French. Our wood comes from the forests of the Ardennes and surrounding areas.
